JUNTA DE DILATAÇÃO TJ5060FW - FABRICANTE TROFBOR

FW Series

É essencial que sejam instaladas juntas de dilatação entre os elementos de concreto e a edificação. A junta apresentada na imagem é apenas uma sugestão, e é importante que o construtor e o proprietário selecionem o modelo mais apropriado para a situação específica da construção. Entretanto, é fundamental que eles entrem em contato com o projetista para obter orientação e garantir que a escolha seja adequada e atenda às exigências do projeto.
